- Database Management (MySQL, PostgreSQL)

Soft Skill

- Problem Solving
- Critical Thinking
- Time Management
- Adaptability
- Teamwork

WORK EXPERIENCE

Web Developer | *Freelance*

November 2024 – May 2025

- Developed application backends using Laravel, building more than 10 RESTful API endpoints to support data management systems
- Integrated RESTful APIs and managed MySQL databases with over five relational tables to support CRUD operations and data validation
- Performed debugging, testing, and code optimization to ensure application performance, reliability, and security

EDUCATION

SMK TELKOM SIDOARJO

Juny 2023 – Now

PROJECT

School Website

- Developed a cloud-based school website that allows users to explore school facilities virtually through the Lab Tour 360 and DTP Trial Class features
- Integrated a Retrieval-Augmented Generation (RAG) chatbot to provide automated responses to user inquiries
- Enhanced and customized the user interface (UI) to create a more modern, responsive, and user-friendly experience

Lumbung Hijau

- Developed a digital platform to support the management of organic waste into economically valuable products.
- Implemented data recording and monitoring features to support waste processing operations.
- Collaborated with a team to integrate environmentally focused technology solutions.
